DEAR CUSTOMER,

As the popularity of reclining chairs, reclining furniture collections, and sleepers continues to rise, many manufacturers have been attracted to these categories of the upholstered furniture industry. For some companies, these are secondary product lines. That usually means buying mechanisms and frames from outside suppliers, with a resulting loss of quality.

In the Action Lane product, we design, engineer, and produce our own frames and patented mechanisms. This keeps control in our hands, and enables us to give you the ease of operation, the comfort, and the durability of frame and mechanism that means superior value. It also enables us to back each of our products with a limited lifetime warranty. Our ever-expanding family of products is thoroughly researched, from the frame to the mechanisms, and from the fabric to the smallest screw. This attention to detail and concern for quality and craftsmanship is the hallmark of Action Lane Furniture. We have devoted ourselves to providing our customers with only the highest quality products at a competitive price.

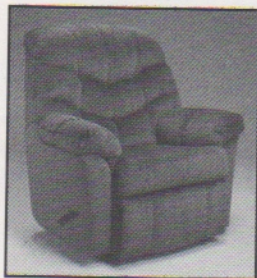

One further thought, the less you know about a product, the more you need the integrity of a nationally known company like Lane. Its reputation is at stake with every product bearing the name, and we proudly attach this name to every product we produce. For you, the owner, this means complete peace of mind.

Sincerely,

Tom Foy,
President and CEO
Action Industries, Inc.

You'll feel like a King in our newly developed line of ComfortKing™ Recliners. Over two years of research and development have gone into these relaxing giants. All elements of the ComfortKing Recliners are produced to stringent standards so that it can withstand the everyday wear-and-tear provided by the big and tall user. In the fully-reclined position, the recliner extends to 80 inches. This allows the taller customer to receive support throughout the entire length of their body. Hidden away inside is an oversized frame, mechanism and seat, built to support weights of up to 300 pounds. The scaling and proportions of this chair have to be seen to be appreciated. The model shown here is 6 feet, 7 inches tall and weighs 302 pounds, yet looks perfectly normal in this recliner.

GENUINE LEATHER

A chair that is upholstered completely with genuine leather.

LEATHER II

A chair that is upholstered in genuine leather everywhere you touch and has matching vinyl everywhere else ... resulting in great savings for you.

IMPORTANT FACTS ABOUT LEATHER. UNIQUENESS

No two pieces of leather are alike. Distinctive marks such as barbed wire nicks, brands, neck wrinkles, or scratches give the individual hide its personality.

CHARACTERISTICS

Leather is half again as strong as any other upholstery material. The color is permanent and today's leather will not crack. Odors and heat are not retained.

ECONOMY

By the yard, leather is expensive; by the year however, it is very economical, due to the fact that it will last up to three times as long as fabric.
